## Welcome to the 2022 New Trend Salers Bull Sale:

*Invitation to Open House/Bull Viewing, March 26th, 2022, 11 am*

On Behalf of Peter, Cody and myself I would like to invite all Commercial cattlemen and Salers Breeders to an Open House and Networking Event to be held at G I T Performance Cattle, Langdon Ab, we will be serving lunch and beverages from 11:00 until everyone is fed. This will be an opportunity for meeting other users of Salers Genetics, sharing our experiences and learning from one another. The New Trend bulls will be on display all day as well as Hotshot our newest Herdsire. We will have an information table with literature from our supplier partners, and hope to have some lively interaction regarding the upcoming 50th Salers Anniversary Celebrations. 50 years is a milestone to reminisce our past successes and plan for future endeavors. 2021 has been a challenging year across much of the North American Cattle Production areas. This is a reminder of how important efficiency and production are, a time when science and sire information are more important than ever before. We have genetic marker data and we ultrasound every bull as well as collecting as much birth, weaning and monthly weight gains to give our users the most tools for sire selection. With the high cost of feed it is more important than ever to have more pounds weaned off of every cow. The first step is live calves born easily and having a vigorous start to their life. Now more than any time in the past is the right time for Salers cattle.

If you are unable to attend on March 26 for any reason Peter, Cody or I will be more than happy to arrange a tour of our herds and bulls at any time. Looking forward to a prosperous 2022 for all in our industry.

### Reference Sires:

**MAC EVANSTON 257E** As complete a Salers bull as I have seen. Perfect conformation, huge feet and testicles, great numbers and perfect disposition. We are retaining all of his females for the herd.

**SF GRADY 2G** We have some very impressive Grady sons in this sale. Grady worked very well as a calving ease bull last year and has proven the quality and performance that you can get out of first calf heifers. He had consistently low birthweights and uniformity in his calf crop.

**STP DOOCY 2F** Doocy has done an excellent job of filling the role of Senior Herdsire for us. He has sired a very impressive set of calves, adding length and depth of body. He has had consistently low birthweights but has also increased weaning weight in these bulls. He has truly worked on all types of cows and has proven to be extremely versatile. Whether you are looking for a high-performance bull for your cows, or a heifer safe sire there is a Doocy son that will serve your needs.
